Phoenix-Denver		\$1.96

Average fuel price per gallon

fuel_purchases total_cost / gallons

Date	Price (\$ / gal)
22/01	4.21
22/07	4.20
23/01	3.85
23/07	3.84
24/01	3.65
24/07	3.65

On-time rate by event type

delivery_events.on_time_flag

Pickup		66.7%
Delivery		44.6%

Full-period findings (all years, unfiltered): Revenue per mile ranges from \$3.62 (Philadelphia-New York) to \$1.70 (Charlotte-Denver), a 2x spread; several of the lowest lanes are long hauls, but not all. Fuel price fell in two steps (about \$4.20 to \$3.85 to \$3.65) while MPG stayed near 6.45, so savings came from price, not efficiency. Pickup on-time is 66.7% vs 44.6% for deliveries, and detention averages about 91 minutes per stop at every facility, which points to appointment scheduling and not one bad site.
