

Logistics Operations Dashboards

Built from your 14 CSVs: Jan 2022 to Dec 2024, 85,410 loads, 150 drivers, 120 trucks.

Full-period findings (all years, unfiltered): Only 92 of 120 trucks (77%) are Active; 15 are in maintenance and 13 inactive. Utilization stays near 83%. Maintenance spend is spread evenly across types. Model-year 2021 trucks cost the most per mile (\$0.056, about 2x the 2019 trucks), so age alone does not explain cost. Note that utilization data exists only for the 92 active trucks.
